

**Trinity Consultants** is a leading global consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Within our Built Environment Division, we bring together renowned firms—Cerami, Longman Lindsey, Valcoustics, Jaffe Holden, and WorkingBuildings—under one banner. From cultural landmarks to mission-critical facilities, we deliver innovative solutions in acoustics, technology, commissioning, and operational support, driven by excellence and human-centered design.

- Monitoring for Transportation and Construction
- Acoustic Simulations
- Code Analysis and Compliance
- Impact Analysis
- Troubleshooting

## Acoustics Services for the Built Environment

We are the trusted leader in the U.S. for all things acoustics. Since 1965, we have built a reputation for excellence, helping clients achieve their design goals through practical, cost-effective solutions that balance performance and budget.

Our decades of experience give us critical foresight to identify and address potential acoustical challenges early in the design process. By integrating advanced simulations, modeling techniques, and in-depth analysis, we provide the feedback necessary for stakeholders to make informed decisions—avoiding costly late-stage design changes while delivering exceptional environments.

- Acoustics and Vibration
- Architectural, Building Services & Interior Acoustics
- Mechanical Noise & Vibration Control
- Sound Masking and Acoustic Privacy
- Structural Dynamics
- Vibration Analysis and Control
- Environmental Assessments
- Community & Industrial Noise Control

## Our Expertise

### Architectural & Interior Acoustics

Designing acoustically comfortable spaces that enhance speech clarity, privacy, and overall experience.

### Mechanical & Structural Noise Control

Managing noise and vibration from building systems and equipment with practical, engineered solutions.

## Environmental & Community Noise

Conducting assessments, modeling, and monitoring to address transportation, industrial, and construction impacts.

## Advanced Modeling & Compliance

Applying acoustic simulations, code analysis, and impact studies to ensure performance and regulatory alignment.

## Problem Solving & Innovation

Troubleshooting complex acoustic challenges with tailored, forward-thinking strategies.

**From design through operation, we ensure that buildings, infrastructure, and communities perform as intended—quiet, resilient, and compliant with the highest standards.**
