

 Trinity Consultants is a leading global consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Within our Built Environment Division, we bring together renowned firms—Cerami, Longman Lindsey, Valcoustics, Jaffe Holden, and WorkingBuildings—under one banner. From cultural landmarks to mission-critical facilities, we deliver innovative solutions in acoustics, technology, commissioning, and operational support, driven by excellence and human-centered design.

We provide comprehensive building commissioning services to verify that complex building systems are designed, installed, tested, and operated in accordance with the owner's project requirements and design intent. Our technically rigorous approach ensures that facilities perform as intended, operate efficiently, and support long-term reliability and maintainability.

Through a combination of analytical review, field verification, and performance testing, we support owners, designers, and operators across the full building lifecycle - from initial concept through ongoing operation and optimization.

- Building Forensics
- Cleanroom Design and Commissioning
- Commissioning and Facility Management Software
- Design Intent Evaluation and Review
- Healthcare Facility Design and Commissioning
- Systems Optimization Analysis

Our Expertise

Building Commissioning

Independent commissioning services to validate the performance of mechanical, electrical, plumbing, life safety, and control systems through systematic testing and documentation.

Building Forensics

Investigation and diagnosis of system failures, performance deficiencies, and operational anomalies using data analysis, field testing, and root-cause evaluation.

Cleanroom Design & Commissioning

Specialized commissioning of cleanroom environments, including airflow verification, pressure relationships, contamination control, and compliance with industry standards.

Commissioning & Facility Management Software

Implementation and integration of digital commissioning platforms and facility management systems to support documentation, analytics, and long-term asset performance.

Design Intent Evaluation & Review

Technical review of design documents to confirm alignment with owner requirements, operational objectives, and regulatory standards prior to construction.

Healthcare Facility Design & Commissioning

Commissioning services tailored to healthcare environments, addressing critical systems, redundancy, infection control, and regulatory compliance.

Systems Optimization Analysis

Performance evaluation and fine-tuning of building systems to improve energy efficiency, operational stability, and occupant comfort post-occupancy.

Our Building Commissioning Services deliver verified performance, reduced operational risk, and optimized system functionality, providing owners with confidence that their facilities are safe, efficient, and resilient throughout their lifecycle.
