

 Trinity Consultants Canada is a leading environmental consultancy that brings together trusted advisors, scientists and engineers to help clients solve their most complex challenges. With deep local roots and the strength of a global organization, Trinity Consultants Canada delivers innovative, scientifically sound and future-ready solutions that help industry, government and Indigenous communities navigate complex regulatory landscapes, secure project permits and approvals to achieve better environmental outcomes. They are internationally respected leaders with decades of proven expertise in Water & Ecology, Environmental Health and Safety (EHS), Built Environment and Life Sciences.

Our Water & Ecology teams are recognized leaders in environmental assessment, permitting and monitoring, offering key services to sectors including renewables, mining, ports and terminals, marine shipping, linear development, liquefied natural gas (LNG), ecological restoration, municipal wastewater, energy, and forestry.

Our Expertise

Environmental management and monitoring for construction projects is a key aspect of our practice. As part of our responsibilities for major EA certified projects, we have extensive environmental compliance monitoring experience in roles as Owners Representative, Contractors QP, and Independent Environmental Monitor and Auditors. We have developed numerous construction ready plans (e.g., Construction Environmental Management Plans (EMPs), Environmental Protection Plans (EPPs), Construction Mitigation Plans, Erosion and Sediment Control Plans (ESCP), and Best Management Practices (BMPs)) for our clients. We also provide and implement Environmental Management Systems (EMS) to help assure compliance of construction projects with regulatory guidance and permits.

Our comprehensive set of professionals and our depth and breadth of experience in diverse fields, industries, and locations allow us to proactively identify environmental risks and efficiently develop effective, practical mitigation measures. We have worked on some of the largest, most complex infrastructure projects through some of the most challenging mountainous terrain and delivered solid results for our clients. We understand the components, challenges, and constraints of construction projects, and can confidently provide the diligence and assurance required to see these through to successful completion.
