Design Services

Trinity
Consultants

Trinity Consultants is a leading global consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Within our Built Environment Division, we bring together renowned firms—Cerami, Longman Lindsey, Valcoustics, Jaffe Holden, and WorkingBuildings—under one banner. From cultural landmarks to mission-critical facilities, we deliver innovative solutions in acoustics, technology, commissioning, and operational support, driven by excellence and human-centered design.

As a premier technology design and consulting partner, we deliver comprehensive design services that integrate advanced systems seamlessly into the built environment. Our team provides the expertise to align design goals with technology needs, ensuring that solutions are functional, reliable, and adaptable for the future.

We focus on bridging architectural intent and technical execution, providing coordinated services that streamline implementation and minimize project risks. From planning through commissioning, our approach ensures that every system contributes to a secure, connected, and high-performing environment.

Design Services

- Audiovisual Systems
- Information Technology
- Security Systems, CCTV, Access Control & Visitor Management Systems
- Data Center Inside/Outside Plant Pathways and Cabling Design
- MEP and Architectural Requirements
- Procurement Services
- Coordination of Telecommunications Requirements
- Construction Administration and Management
- Vendor Management
- Commissioning
- Network Operating Centers
- Digital Asset Management
- Content Strategy and Management

Our Expertise

Audiovisual & IT Systems

Design of audiovisual solutions and information technology infrastructure to support communication, collaboration, and efficiency.

Security & Access Systems

Integrated solutions for CCTV, access control, and visitor management that protect people, property, and assets.

Data Centers & Cabling Infrastructure

Inside/outside plant pathways and structured cabling design for mission-critical operations and enterprise connectivity.

Integration with Building Systems

Coordination with MEP and architectural requirements to ensure smooth incorporation of technology into building designs.

Project Delivery & Oversight

Procurement services, vendor management, and construction administration to streamline implementation and execution.

Commissioning & Operations

Commissioning support and network operations center design to ensure system reliability, resilience, and peak performance.

Digital & Content Management

Digital asset management and content strategy services to help clients leverage technology for communication and organizational goals.

Our Design Services practice ensures **seamless, integrated, and future-ready systems**—helping clients create built environments where technology enhances safety, efficiency, and user experience.
