EHS Compliance Management Assistance in California

Trinity
Consultants

Trinity Consultants is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

Today's highly complex and continually evolving regulations, coupled with reductions in environmental staffing in recent years, are making environmental compliance more challenging than ever. In addition to daily compliance management activities, environmental managers must stay abreast of regulatory changes, determine applicability to their operations, and implement new requirements which are often difficult to interpret. Requirements for monitoring, recordkeeping, and reporting are multiplying, thereby increasing the risk of noncompliance. Further, compliance may require capital and/or operational expenditures that need to be budgeted, so planning for regulatory changes needs to occur in advance.

Trinity's team of highly qualified environmental consultants offer strategic and customized solutions for comprehensive environmental management, including:

- Environmental regulatory monitoring
- Compliance strategy development
- Environmental information technology solutions
- Environmental reporting support
- Professional training
- Compliance auditing services

Environmental Regulatory Monitoring

As an environmental professional, the hectic pace of daily responsibilities can prevent you from staying informed about impending regulatory changes. Trinity can help you stay organized and keep track of dynamic environmental requirements that may impact your industry or facility.

On a regular basis of your choosing (monthly, quarterly, etc.), Trinity reviews the latest proposed, newly promulgated, and recently revised regulations, guidance, policy shifts, and other related environmental agency activities and assesses how they may apply to a particular industry or specifically to your site. We provide a concise, customized summary of how potential changes may impact your facility, including recommendations on any actions that may be needed as a result of a potential regulatory change. This service may be

supplemented with white papers providing a more detailed analysis of the potential impacts of pending regulations of interest. Many of our clients are choosing to take advantage of this cost effective service to be proactive and reduce compliance risk resulting from regulatory changes.

Compliance Strategy

Our team of more than 800 consultants routinely assists clients in completing strategic analyses and assessments associated with facility expansions, compliance interpretations, and regulatory risk management. This customized content comes in various forms, including memos outlining permitting impact options, regulatory white papers, business processes mapping, site specific monitoring plans, and many others. Trinity's internal Knowledge Management System (KMS), a state-of-the-art information technology infrastructure, is an invaluable tool for executing strategic compliance projects. The system enables our consultants to access our institutional knowledge through the real time exchange of information and thereby leverage the depth and breadth of our environmental expertise to help our clients make sound business decisions.

Environmental Information Management Solutions

Compliance with environmental regulations requires management of an extensive amount of information. Trinity's Digital Solutions team is a division of Trinity with specialized expertise in the application of information technology (IT) to advance and transform the way organizations manage environmental data. From improving recordkeeping to streamlining reporting, our unique combination of EHS, IT, and management system capabilities are a powerful combination to provide effective, sustainable solutions for our clients. In addition to enhancing the information management processes, Trinity's Digital Solutions team helps organizations better leverage information to lower compliance and operational risks.

These can include simple compliance calendars to improve the visibility of deadlines and accountability. Trinity's Digital Solutions team can also assist in the deployment of more detailed data and task tracking systems with automated reminder and escalation processes. Already have an environmental management system? Trinity's Digital Solutions team can help maximize the value of your existing systems. With exceptional knowledge in regulatory requirements, information technology, and industry practices, Trinity's Digital Solutions team is ideally suited to provide cost-effective solutions to industry's challenging environmental data management requirements.

Environmental Reporting

Reporting of environmental data is the lifeblood of an organization's environmental footprint, as assessed through the eyes of the government, general public or public interest groups. Ensuring that information is submitted in an accurate and timely fashion is imperative. Trinity routinely assists its clients with their multi-media compliance reporting obligations including the following:

- Annual Emission Inventories
- Title V Semi-Annual Deviation Reports and Annual Compliance Certifications
- MACT Compliance Reports
- EPCRA Reporting: Toxic Release Inventory (TRI) and Hazardous Chemical Inventory (Tier I/II)
- Greenhouse Gas Inventory under 40 CFR 98 (via EPA's eGGRT System)
- EPA Hazardous Waste and State-required Waste Reports
- Water Discharge Reports
- Periodic TSCA Reports

Training

Through our broad professional environmental training courses, Trinity is a go-to resource for helping environmental professionals understand complex environmental regulations. Trinity delivers over 200 public courses each year in addition to many customized, onsite training programs. These courses provide the knowledge and key resources that environmental professionals need to execute their daily responsibilities. Our site-specific training helps to ensure that regulatory obligations are understood throughout an organization and the accompanying customized training manuals serve as excellent reference material after the course.

Trinity Can Help

A robust compliance management system requires periodic assessment and continual improvement. Third-party audits not only assess multi-media compliance risks, but can also help organizations develop new ideas for managing risk or enhancing compliance efficiency. As a result of our extensive environmental consulting experience and in-depth knowledge of state and federal environmental regulations, Trinity is ideally suited to help facilities in wide variety of industries with compliance audits. Further, we offer focused audits of air quality compliance, Leak Detection and Repair (LDAR), Environmental Management System (EMS), and other programs.
