

 Trinity Consultants Canada is a leading environmental consultancy that brings together trusted advisors, scientists and engineers to help clients solve their most complex challenges. With deep local roots and the strength of a global organization, Trinity Consultants Canada delivers innovative, scientifically sound and future-ready solutions that help industry, government and Indigenous communities navigate complex regulatory landscapes, secure project permits and approvals to achieve better environmental outcomes. They are internationally respected leaders with decades of proven expertise in Water & Ecology, Environmental Health and Safety (EHS), Built Environment and Life Sciences.

Our Water & Ecology teams are recognized leaders in environmental assessment, permitting and monitoring, offering key services to sectors including renewables, mining, ports and terminals, marine shipping, linear development, liquefied natural gas (LNG), ecological restoration, municipal wastewater, energy, and forestry.

## Our Expertise

Trinity Consultants Canada has supported clients in successfully navigating the Federal and Provincial Environmental Assessment (EA) processes in Canada for over two decades. As EA and permitting practitioners, our experience includes strategic regulatory advice, work required during initial project planning phases (scoping and feasibility studies), the collection of baseline data, effects analysis, preparation of EA applications and amendment applications, and associated permitting during the pre-application, application, and post-authorization phases of projects.

## Our Services

- Determination of Regulatory Requirements
- Environmental Assessment and Permitting Strategy and Schedule
- Overall Multi-disciplinary Environmental Assessment and Permit Coordination, Compilation and Submission
- Preparation of technical reports, and large environmental application documents
- Biological and Earth Science:
  - Baseline studies,
  - Monitoring,
  - Environmental assessments, and
  - Management plans
