

 Trinity Consultants is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

Since 2018, Europe has mandated registration of chemicals with ECHA (European Chemical Agency) prior to importation and use. Moving chemical volumes of more than one ton into Europe in less than one calendar year may put a strain on your ability to comply with REACH.

Trinity can help. We're skilled and experienced with:

- Managing substance identity by analyzing, evaluating and confirming using a range of methods;
- Identifying and arranging testing labs for evaluation of required toxicological effects;
- Arranging purchase of existing data available for use in your registration;
- Creating ECHA-compliant dossiers for both joint and individual/lead registrant submissions;
- Updating both dossiers and volumes;
- Developing "Extended Safety Data Sheets (eSDS)" where required;
- Plus much more

The work we do can help your regulatory resources staff do more, which helps your bottom line, your speed to market and continuing access.

Talk to us – let us see if we can build a solution for your REACH compliance and improve your access to Europe.

## EU REACH Registration Alternatives

As an alternative to EU REACH registration, one can rely on Only Representative (OR) coverage under a supplier that has the chemical substance registration covered. This coverage requires full disclosure to the OR in exchange for coverage. In some instances, this works well but may be unappealing if your supplier is also a competitor. Our indirect coverage solution can provide an alternative way forward that allows you to conduct business with your own customers while walling off these details from your competitors.
