More 2027 reports and deadlines on back						

Note: This is not an exhaustive list of reporting deadlines. Facility-specific requirements and deadlines may vary. Trinity suggests checking with local regulators for submission deadlines. Submit or postmark reports by the due date for on-time consideration. If due date falls on a weekend or holiday, Trinity recommends you submit or postmark the prior business day.

[1] Per EPA's October 2026 interim final rule, RY2025 GHGRP reports are due March 10, 2027 (extended from October 30, 2026). RY2026 reports remain due March 31, 2027. State reporting deadlines are not affected.

TBD	CDP (previously known as Carbon Disclosure Project) [3]	●	●	●	●	●
TBD	TSCA CDR Report [4]				●	
TBD	PFAS Requirements (one time report under TSCA) [5]				●	

Note: This is not an exhaustive list of reporting deadlines. Facility-specific requirements and deadlines may vary. Trinity suggests checking with local regulators for submission deadlines. Submit or postmark reports by the due date for on-time consideration. If due date falls on a weekend or holiday, Trinity recommends you submit or postmark the prior business day.

[2] The AERR report is now required to be submitted through the Combined Air Emissions Reporting System (CAERS). In addition, 2027 is a Trennial Reporting year; therefore, all Title V facilites must complete an AERR report by July 1, 2027.

[3] CDP is a global non-profit that runs the world's only independent environmental disclosure system for companies, capital markets, cities, states and regions to manage their environmental impacts.

[4] Manufacturers (including importers) are subject to the reporting requirements based on manufacturing (including importing) activities conducted during the reporting period. This report is required every 4 years. The next report will be due in 2028 (covering reporting years for 2024 through 2027).

[5] PFAS reporting under TSCA Section 8(a)(7) is also due in October 2026 which covers import and manufacture of PFAS from 2011 to 2022. This is a one-time data gathering and reporting requirement separate from CDR. While similar to CDR in many ways, the PFAS reporting is much more extensive and does not exclude articles, de minimis concentrations, or low levels of activity. PFAS phase outs have begun with complete bans starting in 2032 unless a currently unavoidable use exemption is obtained or a categorical exemption applies.
