

## Regulatory Support for the Agricultural Industry

**Trinity Consultants** is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

Trinity has extensive experience supporting compliance goals of companies that manufacture, import, purchase, maintain and operate both on-road and off-road engines, vehicles, and equipment.

Agricultural operations in California are subject to various emissions regulations and fleet requirements enforced by the EPA, California Air Resources Board (CARB), as well as local Air Quality Management Districts. Trinity can assist agricultural businesses in complying with the following programs:

- National Emission Standards for Hazardous Air Pollutants for Reciprocating Internal Combustion Engines (NESHAP for RICE)
- CARB Truck and Bus Rule
- CARB Off-Road In-Use Diesel Equipment Regulation
- CARB Portable Equipment Registration Program (PERP)
- CARB Large Spark Ignition (LSI) Fleet Regulation
- CARB Transportation Refrigeration Unit (TRU) Regulation

In addition to regulatory compliance, Trinity provides assistance with seeking incentive funding to upgrade older vehicles, equipment and engines with newer lower emitting alternatives. Both state and local funding is available for vehicle and equipment replacements, repowers, and retrofits, as well as new advanced technology purchases. Statewide incentive programs include:

- Carl Moyer Grant Program:
  - Truck Improvement/Modernization Benefitting Emission Reductions (TIMBER) Program
  - On-Road Heavy-Duty Vehicle Voucher Incentive Program (VIP)
- Funding Agricultural Replacement Measures for Emission Reductions (FARMER) Program – *state approval pending*

Additional funding opportunities may also exist from the local Air Districts. For instance, the San Joaquin Valley Air Pollution Control

District administers the following incentive programs:

- Ag Pump Replacement Program
- Off-Road Replacement Program
- Tractor Replacement Program
- Electrified Dairy Feed Mixing Program

Services that Trinity provides to the agricultural sector include:

- Grant Application Preparation, including emission modeling and cost-effectiveness calculations
- Compliance Planning and Third Party Auditing
- Reporting
- Retrofit Feasibility Analysis
- Tracking of New Regulations and Programs
- Technical Assistance with Government Enforcement Actions.
