

 **Trinity Consultants** is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

As of January 2021, any supplier or product manufacturer must provide information according to article 33(1) of the REACH Regulation to the Substances of Concern In articles, as such or in complex objects (Products) (SCIP) database of the European Chemicals Agency (ECHA). The SCIP notification duty applies from that date onwards. According to Article 3(33) of the REACH Regulation, you have SCIP obligations if you are a producer, importer, distributor or other supply chain actor who places an article containing substances of very high concern (SVHC) on the EU market. Trinity's Global Trade Group has the expertise you need to support all your SCIP submission needs.

We can help you do the following:

- Look at your end product and its components concerning the SCIP requirements
- Check your company's obligations to SCIP reporting
- Compile supplier information, separating EU suppliers from non-EU suppliers

- Contact each of your suppliers regarding the missing documentation: supplier SCIP identifiers, certificates of compliance, other information concerning your SCIP notification duty
- Evaluate your Full Material Disclosures (FMD)
- Use the IUCLID format (International Uniform Chemical Information Database) to prepare your SCIP data
- Submit your SCIP data through the ECHA Submission Portal

ISO 9001:2015 certified at our corporate office in Dallas, Texas
