

Trinity Consultants is a leading global consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Within our Built Environment Division, we bring together renowned firms—Cerami, Longman Lindsey, Valcoustics, Jaffe Holden, and WorkingBuildings—under one banner. From cultural landmarks to mission-critical facilities, we deliver innovative solutions in acoustics, technology, commissioning, and operational support, driven by excellence and human-centered design.

We provide comprehensive sustainability consulting to help organizations design, construct, and operate buildings that reduce environmental impact, improve occupant wellbeing, and achieve long-term performance goals. Our team delivers data-driven strategies and certification guidance that align with evolving standards, client values, and climate objectives.

From early design integration to post-occupancy performance tracking, we combine technical expertise with practical insight to help clients achieve measurable sustainability outcomes—balancing environmental responsibility with operational and economic efficiency.

- LEED Certification
- WELL Building Standard
- GHG Emissions Management
- Life Cycle Analysis and Carbon Footprint Development
- Energy Management
- CDP Verification and Assurance
- Digital Solutions

Our Expertise

LEED Certification

Full-service management and documentation for LEED projects, from concept through certification, across multiple rating systems.

WELL Building Standard

Consulting to support occupant health and wellbeing through WELL certification and wellness-focused building design strategies.

GHG Emissions Management

Development of greenhouse gas inventories, reduction strategies, and performance tracking aligned with global reporting frameworks.

Life Cycle Analysis & Carbon Footprint Development

Assessing material and system impacts to guide low-carbon design, sustainable procurement, and climate-conscious decision-making.

Energy Management

Optimization of energy performance through modeling, audits, and design guidance to reduce consumption and operational costs.

CDP Verification & Assurance

Independent verification and reporting services to ensure transparency and compliance with CDP and other disclosure programs.

Digital Solutions

Leveraging digital tools for data visualization, analytics, and performance tracking to streamline sustainability planning and reporting.

Our Sustainability Services help clients design and operate buildings that are **efficient, resilient, and environmentally responsible**—driving measurable progress toward decarbonization and long-term environmental stewardship.
