

Trinity Consultants is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

Keep Your Digital Systems Working Smarter Long After Go-Live

Digital transformation does not end at implementation. Even the best-designed EHSS (Environmental, Health, Safety and Sustainability) software requires ongoing care, governance, optimization, and user support to continue delivering value as business needs, regulations, operations, and reporting expectations evolve.

Trinity Consultants' Digital Solutions team helps organizations sustain and optimize the systems they have already invested in. We work alongside your team to keep platforms stable, accurate, efficient, and aligned with the way your business operates today, while preparing for what comes next.

Trinity helps transform system maintenance from a reactive support function into a continuous improvement engine that reduces risk, improves data confidence, strengthens adoption, and extends the value of your technology investment.

Maximize System Value. Sustain Performance. Enable Continuous Improvement.

Once software is selected and implemented, organizations often face a new challenge: keeping the system working as intended while

adapting to changing requirements, new users, evolving workflows, and expanding reporting needs. Trinity helps close that gap.

Our Sustainment & Optimization Services provide ongoing support, enhancement, and governance to help your digital systems remain effective, trusted, and scalable. Whether your organization needs day-to-day administration, user support, configuration improvements, reporting enhancements, data quality reviews, or a long-term optimization roadmap, Trinity serves as an embedded partner focused on making your system work better for your business.

What We Deliver

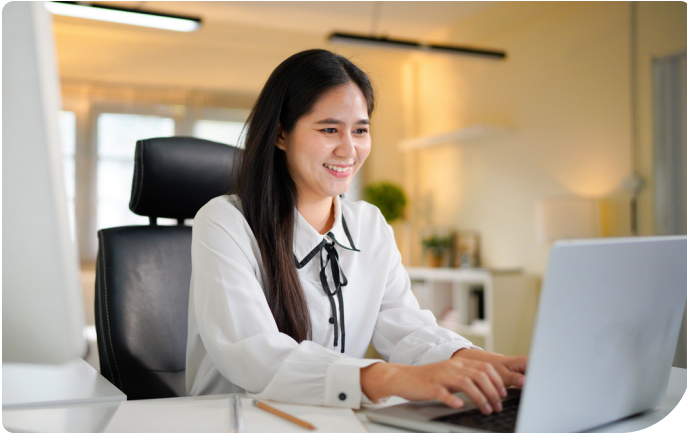

Trinity provides structured sustainment and optimization services across three connected areas of system health and performance.

Operational & Maintenance Support

We help keep your system stable, accessible, and reliable so your teams can focus on the work that matters.

- Day-to-day system administration and maintenance
- Help desk support for users, administrators, and system owners
- Configuration support and issue resolution
- Performance monitoring and system health reviews
- Workflow, form, report, and dashboard updates
- User access, role, and permission management
- Platform lifecycle planning and release support
- Support for integrations, data imports, and routine system processes

Outcome: A more reliable system with fewer disruptions, faster issue resolution, and stronger day-to-day usability.

Strategic Enhancements & Optimization

We help clients continuously improve their systems, so platforms remain aligned with business priorities, regulatory obligations, and operational realities.

- System optimization assessments
- Enhancement roadmaps and prioritization support
- Workflow and process improvement
- Configuration updates to support evolving business needs
- Expansion into new use cases, sites, business units, or modules
- Reporting and dashboard improvements
- Automation of manual or repetitive processes
- Data quality, validation, and governance improvements
- Support for upgrades, releases, and platform evolution

Outcome: A system that continues to improve over time, supporting better visibility, stronger efficiency, and more confident decision making.

Change Management, Governance & Training

Technology only delivers value when people use it effectively. Trinity helps organizations strengthen adoption, align stakeholders, and establish governance practices that support long-term success.

- User training and administrator enablement
- Refresher training for existing users
- Onboarding support for new users, sites, or teams
- Governance model development and facilitation
- Stakeholder alignment and communications support
- Support for operational, regulatory, organizational, and technology changes
- Documentation, standard operating procedures, and user guidance
- Adoption monitoring and improvement planning

Outcome: Better adoption, clearer ownership, stronger governance, and a system that remains connected to business needs.

Why It Matters

Trinity helps organizations get more value from the systems they have already implemented. By combining EHSS expertise, digital execution, and practical support, we help keep platforms stable, trusted, and aligned with evolving business, regulatory, and reporting needs.

Our sustainment approach improves system reliability, strengthens data quality, supports user adoption, and extends the useful life of your technology investment, helping your teams manage with confidence today while preparing for what's next.

Let's Optimize What You've Built

Your digital system is already in place. Now let's make sure it continues to perform.

Trinity Consultants' Sustainment & Optimization Services help organizations protect, improve, and expand the value of their EHSS technology investments through practical support, continuous improvement, and long-term partnership.

Contact Trinity today to learn how we can help keep your system stable, effective, and optimized for lasting performance.
