

 Trinity Consultants is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

As part of the Emergency Planning and Community Right-to-Know Act (EPCRA), EPA developed the Toxic Release Inventory (TRI) Reporting requirements under 40 CFR 372, to provide the public with information about releases and transfers of toxic chemicals in their community. As a result, U.S. facilities in most industry sectors must report annually to both the EPA and the state how much of each toxic chemical is released to the environment and/or managed through recycling, energy recovery, and treatment.

Trinity has conducted chemical release estimates for thousands of facilities, some with complex processes involving complicated chemical reactions and generating dozens of waste streams. We utilize many resources to determine the most appropriate release estimation method for each chemical.

Any owner or operator of a facility employing 10 or more full-time employees that manufactures, processes, or otherwise uses one of the 690+ specified chemicals and chemical categories covered by the TRI program above the established level, must report the following data annually on July 1:

1. How much of each chemical is released into each environmental media?
2. How much of each chemical is managed through on-site and off-site recycling, energy recovery, and treatment?

The following industry sectors are subject to TRI reporting program:

- Electric Power Generation (NAICS Code 221)
- Federal Facilities
- Hazardous Waste Treatment (NAICS Code 562)
- Manufacturing (NAICS Codes 31-33)
- Merchant Wholesalers (NAICS Code 424)
- Mining (NAICS Code 212)
- Publishing (NAICS Codes 511, 512, 519)

- Wholesale Electronic Markets and Agents Brokers (NAICS Code 425)
- Natural Gas Processing Facilities (NAICS 211130 and SIC 1321)

TRI Compliance Services

Trinity assists organizations with annual TRI reporting by:

- Conducting threshold determinations to confirm reporting applicability
- Developing media-by-media release, treatment, and transfer estimates for each chemical
- Auditing previous reports for accuracy and correcting them as needed
- Completing the EPA eDisclosure process for reporting and correcting past reporting errors
- Performing risk assessment modeling for chemical releases
- Assisting with implementing Pollution Prevention Practices
- Reviewing the liability from vendors that treat or recycle waste streams

Why Choose Trinity

In short, there's no better choice for your chemical compliance support needs. Our experience is multi-faceted and extensive. Our strategies are innovative, time saving, and cost-effective. Our staff and tools are the best in the business.
