

Trinity Consultants is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

Digitize EHS Management with a SaaS Platform Built for the Way You Do Business

In today's marketplace, how you manage your organization's EHSQ, ESG, and ORM¹ issues matters. Not only for the sake of compliance, but also for the sake of your operations.

So, your decision to consider Cority's award-winning, purpose-built SaaS platform to manage your EHS data is a smart move. In addition, employing Trinity's Digital Solutions team to ensure your project strategy, implementation, and platform maintenance meet your operational nuances and reporting needs is equally as smart

"Where Cority's platform provides the foundation for improved EHS management, Trinity makes your investment work specifically to your unique challenges."

About Cority Software

Cority Software is an industry-recognized leader in EHS, quality, and environmental social governance (ESG) software and solutions, with over 35 years of experience serving clients worldwide. Their user-centric enterprise platform is designed to enhance environmental, health, safety, quality, and analytics activities through a state-of-the-art, unified experience that provides superior flexibility, improved collaboration, amplified business intelligence, and increased performance for simplified, streamlined EHS management.

About Trinity Consultants

Trinity Consultants helps companies overcome complex, mission-critical challenges related to EHS, engineering, and science across a broad range of industries and geographies worldwide. For nearly 50 years, we have served clients in the energy, transportation, manufacturing, life sciences, technology, mining, and process industries, among others.

Our Digital Solutions team focuses on three key competencies: (1) subject matter expertise, (2) business process engineering, and (3) technology best practices to your Cority journey, from initial analysis and planning, through implementation and ongoing support.

Partnership Case Studies

Supply Risk Management.

Trinity helped a private client to design, build, and deploy a supply chain risk management system on Cority's platform. The resulting solution provides risk leaders and owners with a standardized dataset for advanced analytics, including bowtie, cost-benefit, and other decision inputs.

Air Emissions Inventory Tracking & Reporting.

Trinity provided strategic support to a natural gas midstream and production company, enabling asset inventory tracking and emissions reporting on Cority-EMS. Work included maintenance of asset inventory changes, as well as identification, design, and execution of Cority-EMS improvements in data integration and centralization, reporting accuracy and efficiency, and system performance.

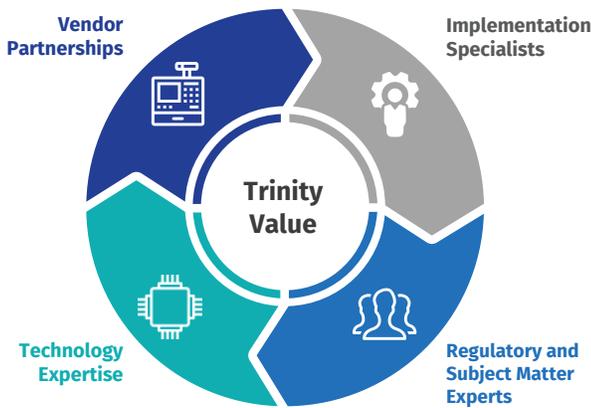

Incident and Observation Management System.

Trinity helped a global manufacturing client plan, design, build, and deploy Cority's comprehensive incident management system to manage safety incidents, near-misses, and behavior-based observations. The project was completed on-budget in three months, earning high marks for client satisfaction.

Make the Most of Your Cority Investment

Cority is a highly functional and configurable software solution that meets standard industry requirements. However, your decisions on how you leverage this powerful software can be critical to your long-term success on the platform.

As a SaaS solution, Cority lives on the cloud. This supports powerful business intelligence, data visualization, and predictive analytics in a user-friendly environment that is easy to maintain and enhance, provided your implementation is attuned to your business needs.

Work with a Preferred Partner

As a recognized, preferred Cority Software solutions partner, Trinity Consultants intimately understands the inner workings of Cority's platform and can fine-tune it to meet the unique needs and practices of your business. Our process is as follows:

- **Plan.** Based on a full assessment of your unique organizational needs, we help you develop a comprehensive roadmap and implementation plan for your near-term and long-term objectives.
- **Design.** We then prepare your team for the journey, collaboratively design the solution blueprint, and (where needed) complete a pilot / proof-of-concept.
- **Build.** Upon design sign-off, Trinity assists in the data discovery, system configuration, report generation, and integration build-out of your Cority solution.
- **Deploy.** Before go-live, we facilitate user acceptance testing to ensure your deployed solution meets your intended design and co-deliver end-user training to ready your organization for the impending change.
- **Support.** Trinity remains committed to your success, providing the necessary services you need to sustain, improve, and evolve for optimal performance.

Experience the Benefits of Cority + Trinity

- Access to extensive domain knowledge and software expertise from the Cority + Trinity teams
- Streamlined deployment based on intelligently designed solutions

- Unique agile-waterfall build methodology to allow for an evolutionary deployment without sacrificing timeline or budget
- Rigorous system validation through proven test and implementation strategies
- Organizational change management ensuring widespread user adoption
- Sustained platform life expectancy through a preferred Cority partner
- Reduced project risk from launch through ongoing maintenance and support

Ensure a Successful Journey with Trinity Consultants

Manage your EHS program efficiently. Enable the unified processes you need to ensure compliance and reduce your operational risk. With Trinity, you are on the way to a more productive, satisfying, and sustainable Cority deployment.
