# Trinity Consultants and Enablon: Partnering for Value

**Trinity Consultants** is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise, industry depth, and specialized capabilities to help clients achieve their goals across the natural and built environments.

## Software Aligned to Help You Act Responsibly, Work Efficiently, and Stay Safe

Fast-growing companies today realize that their success depends on how well they manage Operational Risk, EHSQ, and ESG[1] issues. These business concerns require specialized knowledge – and specialized software – to effectively navigate an ever-litigious and ever-evolving environmentally-focused business climate.

In response, Trinity has partnered with Enablon to provide expert planning, implementation, and support services focused on customizing Enablon's cloud-based risk and compliance, engineering and operations, and EHSQ and sustainability solutions to meet your specific business needs.

> *"With Trinity Digital Solutions on your side, you can count on a uniquely tailored Enablon solution that helps you manage risk, drive sustainability, and boost productivity across your entire value chain."*

## About Wolters Kluwer Enablon®

Enablon's mission has always been to help create a better world by making organizations safer, more efficient, and more sustainable through technology innovation. To that end, their integrated risk management platform has been designed to protect organizations against workplace hazards, comply with regulations, perform environmental reporting, conduct audits and inspections, and manage stakeholders. Founded in 2000, Enablon is an award-winning company owned by Wolters Kluwer, a global provider of professional information, software solutions, and services offered in over 180 countries.

## About Trinity Consultants

Trinity Consultants helps companies overcome complex, mission-critical challenges related to EHSQ and ESG, engineering, and science across a variety of industries and geographies worldwide. For nearly 50 years, we have served clients in the energy, transportation, manufacturing, life sciences, technology, mining, and process industries, among others.

Our Digital Solutions team focuses on three key competencies: (1) subject matter expertise, (2) business process engineering, and (3) technology best practices to your Enablon journey, from initial analysis and planning, through implementation and ongoing support.

## From Occupational Risk to EHSQ and ESG Compliance, Enablon Gets It Done
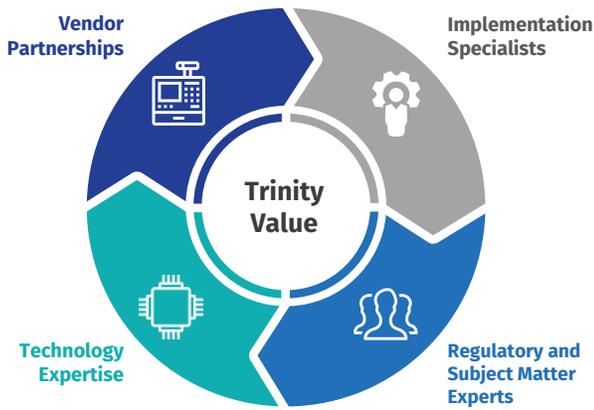

Enablon solutions are designed to work together in a single, integrated, mobile-friendly platform to support corporate and operational goals, while alleviating pressure from regulatory agencies, internal management, and stakeholders to achieve EHSQ and sustainability objectives. Their Vision platform brings together all the functionality necessary to streamline management of these tasks, breaking down data silos across applications for a more fluid, responsive user experience.

Enablon software is suitable for public cloud, private cloud, or on-premise deployment. It is also fully configurable to meet local, regional, and national regulatory requirements, as well as facility, site, region, or corporate-specific requirements.

## Partnership Case Studies

**Streamlined Reporting Experience.** Trinity helped a major client implement customized reporting solutions within the Enablon software suite, as well as within other business intelligence software, such as PowerBI and Tableau. As a result, the client was able to track compliance status by plant, business area, and corporate level for easy identification and prevention of potential non-compliance issues in real time.

**Operational Compliance Management.** Trinity assisted a power-generating company in selecting and implementing an operational compliance management system powered by Enablon. Applications included Incident Management, Action Plans, Regulatory Compliance Management, Job Hazard Analysis, Audits and Inspections, and Management of Change. Trinity continues to support the client.

Trinity Value
- Vendor Partnerships
- Implementation Specialists
- Regulatory and Subject Matter Experts
- Technology Expertise

## Ensure a Successful Journey with Trinity Consultants

Manage your EHSQ, ESG and Operational Risk program efficiently. Enable the unified processes you need to ensure compliance and reduce your operational risk. With Trinity, you are on the way to a more productive, satisfying, and sustainable Enablon deployment.

## Work with a Preferred Partner

To get the most out of your Enablon investment, count on Trinity Consultants, a recognized, preferred Enablon solutions partner. Our team of Certified Enablon implementation analysts understands the inner workings of Enablon's comprehensive product offerings. Our client-first approach will help you:

- **Plan.** Based on a full assessment of your unique organizational needs, we help you develop a comprehensive roadmap and implementation plan for your near-term and long-term objectives.
- **Design.** We then prepare your team for the journey, collaboratively design the solution blueprint, and (where needed) complete a pilot/proof-of-concept.
- **Build.** Upon design sign-off, Trinity assists in the data discovery, system configuration, report generation, and integrated build-out of your Enablon solution.
- **Deploy.** Before go-live, we facilitate user acceptance testing to ensure your deployed solution meets your intended design, and co-deliver end-user training to ready your organization for the impending change.
- **Support.** Trinity remains committed to your success, providing the necessary services you need to sustain, improve, and evolve for optimal performance.

## Experience the Benefits of Enablon + Trinity

- Streamlined deployment based on intelligently designed solutions
- Unique agile waterfall build methodology to allow for an evolutionary deployment without sacrificing timeline or budget
- Rigorous system validation through proven test and implementation strategies
- Organizational change management ensuring widespread user adoption
- Sustained platform life expectancy supported by a preferred Enablon partner
- Access to both Trinity's extensive domain knowledge and software expertise, as well as Enablon's dedicated services team
- Reduced project risk from launch through ongoing maintenance and support
