About Trinity Consultants

Trinity Consultants helps companies overcome complex, mission-critical challenges related to EHSQ and ESG, engineering, and science across a variety of industries and geographies worldwide. For nearly 50 years, we have served clients in the energy, transportation, manufacturing, life sciences, technology, mining, and process industries, among others.

Our Digital Solutions team focuses on three key competencies: (1) subject matter expertise, (2) business process engineering, and (3) technology best practices across your Intelex journey, from initial analysis and planning, through implementation and ongoing support.

Partnership Case Studies

Incidents and Permits Management.

Trinity assisted a major, publicly traded mine development company implement Intelex for various functions such as compliance and permits management, incidents management, and document control, among others.

Global Platform Design and Implementation.

Trinity led an EHS software planning project for a global biopharmaceutical company that included a needs assessment, software technology screening, and detailed software evaluation. The project resulted in the deployment of Intelex's EHS platform for incident management, change management, sustainability performance, compliance management, and air, water, and waste applications.

ACTS Expansion and User Adoption.

Trinity's unique combination of regulatory expertise and ACTS development capabilities resulted in high quality and reliable delivery of ACTS implementation support services. Trinity developed processes and reports to streamline data acquisition to existing sites and implemented ACTs for new facilities. Trinity user adoption and support, including support for inspection and GHG reporting.
