

 Trinity Consultants is a leading global environmental consulting firm that brings 50 years of experience providing services and solutions in the EHS Regulatory Compliance, Built Environment, Life Sciences, and Water & Ecology markets. Trinity has the technical expertise and acute industry knowledge to provide optimal solutions to highly complex pharmaceutical development, process, safety, and facility design challenges.

Safety Partners + SciSure

Safety Partners extends the SciSure platform with expert-driven safety strategy, regulatory insight, and hands-on EHS support—ensuring labs stay compliant, protected, and operationally strong.

Safety Partners, part of Trinity Consultants Life Sciences, has been helping life science and high-tech companies navigate complex EHS regulations for over 30 years. With a team of experienced Consulting Safety Officers, Safety Partners delivers customized, practical EHS programs tailored to each client's culture, science, and space.

SciSure is the Scientific Management Platform (SMP) that connects ELN, LIMS, inventory, and EHS in one unified system for life science labs. Designed for scale and simplicity, SciSure replaces fragmented tools and gives scientists, LabOps, and compliance teams the clarity and control they need to run research with confidence.

- Expert-led lab safety and EHS services built for complex research environments.
- A connected digital platform that centralizes compliance, chemical inventory, SDS, inspections, training, and corrective actions.
- From reactive safety management to proactive, technology-driven risk prevention.
- Reduced exposure. Stronger compliance. Safer, audit-ready labs.

Better together. Expert-led. Technology-driven.

Safety Partners Brings the Expert Consulting:

- Embedded EHS expertise
- Lab safety program development and oversight
- Regulatory compliance assessments and gap analyses
- Training, inspections, and corrective action support
- Facilitation of initial permits and renewals
- On-site and remote safety consulting services

SciSure Brings the Software Platform:

- A connected EHS and Risk Management platform
- Chemical inventory and hazard data workflows
- Robust SDS database with auto-match at the container level
- Incident management
- Lab equipment management
- Procurement integration for seamless inventory and regulatory compliance
- Real-time collaboration between Consultant and Client

Key Benefits

Digital Platform for Full Transparency Between Consultant and Client

- **Proactive Risk Management:** Identify hazards before they become incidents through structured assessments and digitally managed corrective actions
- **Total Confidence in Compliance:** Align safety programs with Federal, State, and Municipal regulatory standards while maintaining centralized, searchable documentation within SciSure
- **Stronger Safety Culture:** Reinforce accountability with consistent training, documented procedures, and clear ownership of EHS tasks.
- **Reduced Operational Disruption:** Prevent costly shutdowns, fines, and remediation efforts through ongoing oversight and early intervention
- **Connected Safety Data:** Link inspections, training records, chemical inventories, lab equipment, and incident reports into one integrated system

- Equipment management
- Ongoing EHS maintenance and support
- Consultants work directly in the platform—eliminating errors and making data accurate, audit-ready, and accessible.

SciSure Platform Integration

- Centralized EHS workflows and task tracking
- Chemical inventory and hazard alignment
- Inspections, incident, equipment management and reporting dashboards
- Digital training record management

Why Scientific Organizations Need This

Safety Partners replaces fragmented, reactive approaches with structured EHS programs embedded directly into SciSure's enterprise grade platform. You no longer have to choose between expert EHS consulting and best-in-class technology — you can now have both.

We help solve:

- Inconsistent inspections and documentation
- Gaps in regulatory compliance and reporting
- Reactive incident management
- Unclear ownership of corrective actions
- Increased exposure to fines and operational risk

What's Included

Safety & EHS Services

- A fully digital platform for tracking of all EHS consulting and inventory records
- Comprehensive lab safety assessments
- Industrial hygiene monitoring and evaluations
- Regulatory compliance support and gap analysis
- Safety program development and documentation
- Training programs (on-site and virtual)
- Inspection and corrective action management
